

Date: 24/02/2026
Name: Dhanya S

I am Dhanya S from Kakunje software working as an intern. Today i had my 20 session it was an interesting session and mam had thought us about ReactJS. Today i learned about ReactJS and its components, how to create a new project in `reactjs` using terminal, how to create a variable and how to call it in `app.jsx` we had seen, how to style the text using inline `css` and how to import that file in `app.jsx`, some adding and multiplying concepts had been seen today, how to create a button using react etc.

demo > src > App.jsx > App

```
1  import React from 'react';
2  import StudentDetails from './StudentDetails';
3  import Multiple from './Multiple';
4  import Button from './Button';
5  import Message from './Message';
6  // import New from './New';
7  // import Inline from './Inline';
8  // import Click from './click';
9
10 function App(){
11     return(
12         <div>
13             <StudentDetails/>
14             <Multiple/>
15             <Button/>
16             <Message/>
17         </div>
18     );
19 }
20 export default App;
21
```

demo > src >  StudentDetails.jsx >  StudentDetails

```
1  import React from 'react'
2
3  function StudentDetails() {
4    const studentName = "Abc";
5    const course = "MCA";
6    const year = "2026";
7    return (
8      <div>
9        <h2 style={{color:"green"}}>Student Name: {studentName}</h2>
10       <h3>Course: {course}</h3>
11       <h3>Year: {year}</h3>
12     </div>
13   );
14 }
15 export default StudentDetails;
```

demo > src >  Multiple.jsx >  Multiple

```
1  import React from 'react'
2
3  const Multiple = () => {
4    const num1=2;
5    const num2=10;
6    return (
7      <div>
8        <h2>Multiplication is {num1*num2}</h2>
9      </div>
10   )
11 }
12
13 export default Multiple
14
```

demo > src > Button.jsx > Button

```
1  import React from 'react'
2
3  function Button() {
4    function handleClick() {
5      alert("Form Submitted");
6      console.log("Submitted Successfully");
7    }
8    return (
9      <div>
10        <button onClick={handleClick}>Submit</button>
11      </div>
12    );
13  }
14  export default Button;
15
16
17
```

demo > src > Message.jsx > Message > padding

```
1  import React from 'react'
2
3  function Message(){
4    return(
5      <p style={{color:"purple",backgroundColor:"lightgray",padding:"10px"}}>Hello world</p>
6    )
7  }
8
9  export default Message
10
```

localhost:5174 says

Form Submitted

OK

Student Name: Abc

Course: MCA

Year: 2026

Multiplication is 20

Submit

Hello world

Student Name: **Abc**

Course: **MCA**

Year: **2026**

Multiplication is **20**

Submit

Hello world
