

Date: 02/03/2026
Name: Dhanya S

I am Dhanya S from Kakunje software working as an intern. Today i had my 25 session it was an interesting session and mam had thought us about ReactJS. Today i learned about how to import bootstrap in reactjs and how to install it in the terminal, how to give image in reactjs had been seen today, how to install react-router-dom in terminal and how to create different folders in src also the jsx and css file.

main.jsx

```
import { StrictMode } from 'react'
import { createRoot } from 'react-dom/client'
import './index.css'
import App from './App.jsx'

createRoot(document.getElementById('root')).render(
  <StrictMode>
    <App />
  </StrictMode>,
)
```

App.jsx

```
import React from 'react'
import { BrowserRouter, Routes, Route } from "react-router-dom";
import Navbar from './components/Navbar';
import Home from './components/Home';
import Feedback from './components/Feedback';
import About from './components/About';
import ThemeProvider from './context/ThemeContext';
import Login from './components/Login';
import './App.css';

const App = () => {
  return (
    <ThemeProvider>
      <BrowserRouter>
        <Navbar/>
        <Routes>
          <Route path="/" element={<Home/>} />
        </Routes>
      </BrowserRouter>
    </ThemeProvider>
  )
}
```

```

    <Route path='/feedback' element={<Feedback/>}/>
    <Route path='/about' element={<About/>}/>
    <Route path='/login' element={<Login/>}/>
  </Routes>
</BrowserRouter>
</ThemeProvider>
)
}

```

```
export default App
```

App.css

```

body{
  margin: 0;
  padding: 0;
  box-sizing: border-box;
  background-color: gainsboro;
  font-family: Arial, Helvetica, sans-serif;
}

```

About.jsx

```

import React from 'react'
import "../styles/About.css"

const About = () => {
  return (
    <div>
      <h1 className='about'>About</h1>
    </div>
  )
}

```

```
}
```

```
export default About
```

About.css

```
.about {  
  font-size: 40px;  
  margin-top: 100px;  
  color: #2c3e50;  
  font-weight: bold;  
  letter-spacing: 2px;  
  text-transform: uppercase;  
}
```

Feedback.jsx

```
import React, { useContext, useEffect, useState, useRef } from 'react'  
import { ThemeContext } from '../context/ThemeContext';  
import "../styles/feedback.css"
```

```
const Feedback = () => {  
  const [name, setName] = useState("");  
  const [message, setMessage] = useState("");  
  const [submitted, setSubmitted] = useState(false);  
  const inputRef = useRef(null);  
  const { theme } = useContext(ThemeContext);  
  
  useEffect(() => {  
    inputRef.current.focus();  
  }, []);
```

```

const handleSubmit = (e) => {
  e.preventDefault();
  setSubmitted(true);
};

return (
  <div className={`feedback ${theme}`}>
    <h2>Feedback Form</h2>
    {!submitted ? (
      <form onSubmit={handleSubmit}>
        <input
          type="text"
          ref={inputRef}
          placeholder="Enter your name"
          value={name}
          onChange={(e) => setName(e.target.value)}>

        <textarea
          placeholder="Enter your feedback"
          value={message}
          onChange={(e) => setMessage(e.target.value)}>

        <p>Characters: {message.length}</p>
        <button type="submit">Submit</button>
      </form>
    ) : (
      <h3>Thank you {name} for your feedback</h3>
    )}
  </div>
);
};

```

```
export default Feedback;
```

Feedback.css

```
.feedback {  
  padding: 40px;  
  text-align: center;  
}
```

```
.feedback form {  
  display: flex;  
  flex-direction: column;  
  width: 300px;  
  margin: auto;  
}
```

```
.feedback input,  
.feedback textarea {  
  margin: 10px 0;  
  padding: 10px;  
  border: 1px solid #ccc;  
  border-radius: 5px;  
}
```

```
.feedback button {  
  padding: 10px;  
  background-color: #4caf50;  
  color: white;  
  border: none;  
  border-radius: 5px;
```

```
    cursor: pointer;
}
```

```
.feedback button:hover {
  background-color: #45a049;
}
```

```
.light {
  background-color: white;
  color: black;
}
```

```
.dark {
  background-color: #121212;
  color: white;
}
```

Home.jsx

```
import React, {useEffect} from 'react'
import "../styles/Home.css"
```

```
const Home = () => {
  useEffect(()=>{
    console.log("hello")
  },[])

  return (
    <div className='home'>
      <h1>Welcome to student feedback portal</h1>
      <p>Share your feedback with us.</p>
    </div>
  )
}
```

```
    </div>
  )
}
```

```
export default Home
```

Home.css

```
.home {
  display: flex;
  flex-direction: column;
  justify-content: center;
  align-items: center;
  padding: 40px 20px;
  color: purple;
  text-align: center;
}
```

```
.home h1 {
  font-size: 36px;
  margin-bottom: 15px;
}
```

```
.home p {
  font-size: 18px;
  color: #555;
}
```

Login.jsx

```
import React, { useContext, useEffect, useState, useRef } from 'react'
import { ThemeContext } from '../context/ThemeContext';
```

```
import "../styles/login.css"
```

```
const Login = () => {  
  const [name, setName] = useState("");  
  const [email, setEmail] = useState("");  
  const [submitted, setSubmitted] = useState(false);  
  const inputRef = useRef(null);  
  const { theme } = useContext(ThemeContext);
```

```
  useEffect(() => {  
    inputRef.current.focus();  
  }, []);
```

```
  const handleSubmit = (e) => {  
    e.preventDefault();  
    setSubmitted(true);  
  };
```

```
  return (  
    <div className={`login ${theme}`}>  
      <h2>Login</h2>  
      {!submitted ? (  
        <form onSubmit={handleSubmit}>  
          <input type="text" ref={inputRef}  
            placeholder="Enter your name" value={name}  
            onChange={(e) => setName(e.target.value)} />  
          <input type="email" placeholder="Enter your email"  
            value={email} onChange={(e) => setEmail(e.target.value)} />  
          <button type="submit">Submit</button>  
        </form>
```

```
    ) : (  
      <h3>Welcome {name}</h3>  
    )}  
  </div>  
);  
};
```

```
export default Login;
```

Login.css

```
.login {  
  display: flex;  
  flex-direction: column;  
  justify-content: center;  
  align-items: center;  
  padding: 40px;  
  text-align: center;  
}
```

```
.login form {  
  display: flex;  
  flex-direction: column;  
  width: 300px;  
}
```

```
.login input {  
  margin: 10px 0;  
  padding: 10px;  
  border: 1px solid #ccc;  
  border-radius: 5px;
```

```
}
```

```
.login button {  
  margin-top: 10px;  
  padding: 10px;  
  border: none;
