

Date: 27/02/2026
Name: Dhanya S

I am Dhanya S from Kakunje software working as an intern. Today i had my 23 session it was an interesting session and mam had thought us about ReactJS. Today i learned about Hooks in ReactJS, Hooks that uses single value and multiple values, useeffect - with dependency and without dependency, cleanup function that clears the interval, usercontext - like creating parent and class component, useref - example that focus the input field, custom Hook means user can perform this operation. |

demo > src > CounterBg.jsx > default

```
1  import React, { useState } from "react";
2
3  const CounterBg = () => {
4    const [count, setCount] = useState(0);
5    return (
6      <div style={{backgroundColor: count > 5 ? "green" : "white",padding: "20px",textAlign: "center"}}>
7        <h2>Count: {count}</h2>
8        <button onClick={() => setCount(count + 1)}>+ Increase</button>
9        <button onClick={() => setCount(count - 1)}>- Decrease</button>
10       {count > 5 && <p>Count is greater than 5</p>}
11     </div>
12   )
13 }
14
15 export default CounterBg;
```

demo > src >  AutoWelcome.jsx >  default

```
1  import React, { useEffect } from "react";
2
3  const AutoWelcome = () => {
4    useEffect(() => {
5      alert("Welcome to React Hooks");
6      console.log("Component Mounted");
7    }, []);
8    return (
9      <div>
10        | <h2>Welcome to React Hooks</h2>
11        </div>
12      )
13    }
14
15  export default AutoWelcome;
```

demo > src > ShowMessage.jsx > ShowMessage

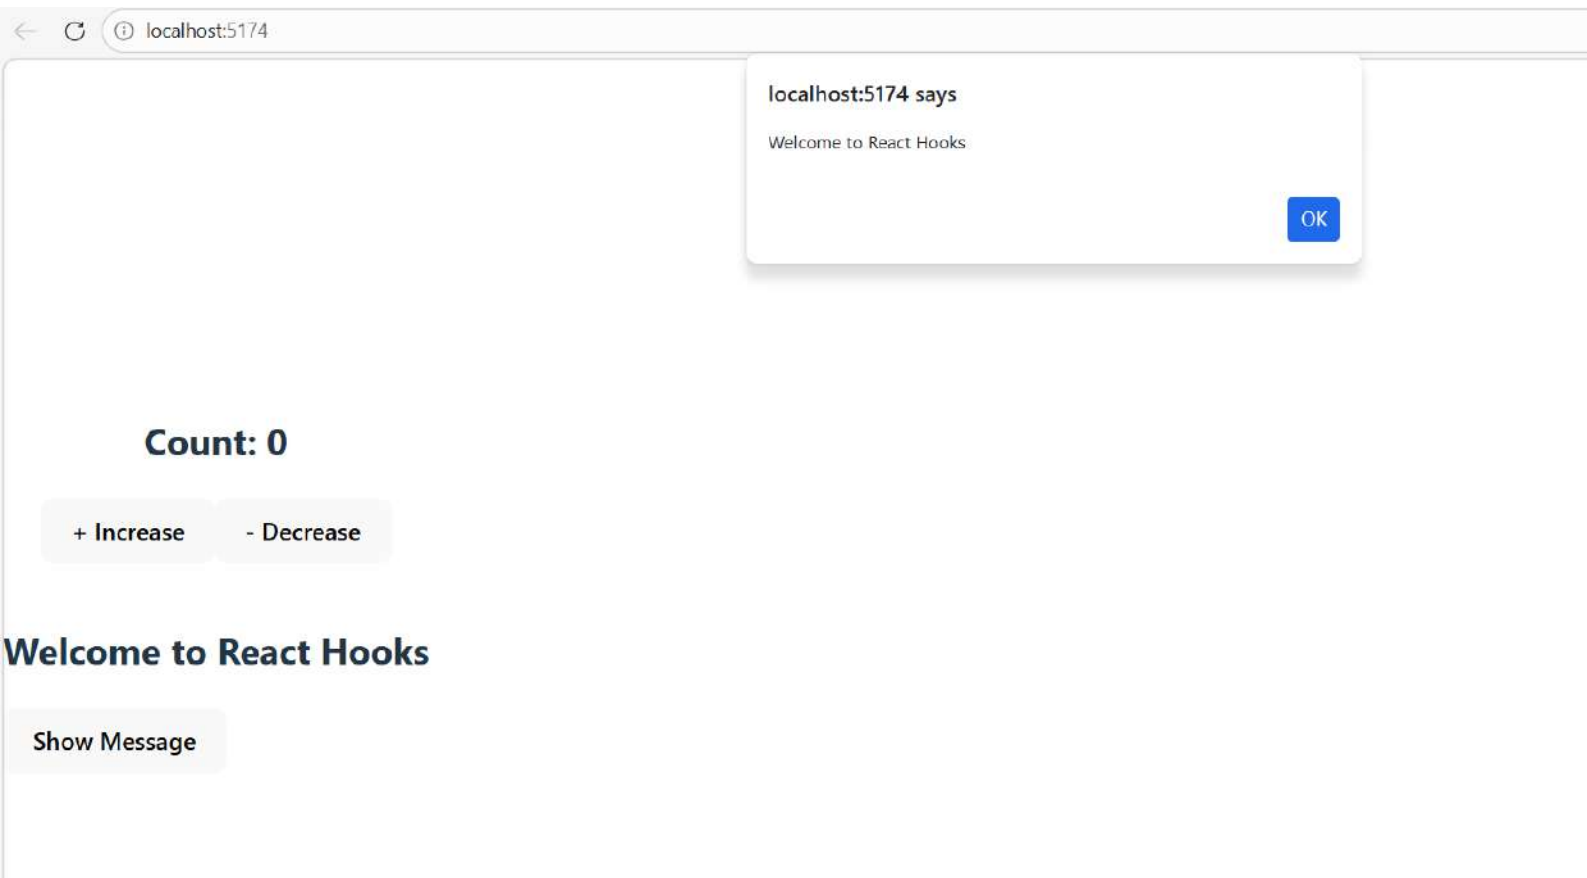

```
1  import React, { useState, useRef } from "react";
2
3  const ShowMessage = () => {
4    const [show, setShow] = useState('');
5    const inputRef = useRef(0);
6    const handleClick = () => {
7      setShow(true);
8      setTimeout(() => {
9        inputRef.current.focus()
10      });
11    }
12    return (
13      <div>
14        <button onClick={handleClick}>Show Message</button>
15        {show && (<input type="text" ref={inputRef}/>)}
16      </div>
17    );
18  }
19
20  export default ShowMessage;
```

demo > src > App.jsx > App

```
1  import React from 'react';
2  import CounterBg from './CounterBg';
3  import AutoWelcome from './AutoWelcome';
4  import ShowMessage from './ShowMessage';
5  // import UserContext from './UserContext';
6  // import ChildComponent from './ChildComponent';
7  // import Hooks1 from './Hooks1';
8  // import UseState2 from './UseState2';
9  // import ProfileCard from './ProfileCard';
10 // import LiveInput from './LiveInput';
11 // import LoginForm from './LoginForm';
12 // import FeedbackForm from './FeedbackForm';
13 // import ClickExample from './ClickExample';
14 // import Focus from './Focus';
```

```
46
47 function App(){
48     // const showMessage =()=>{
49     //     alert("hello from parent component");
50     // };
51     return(
52         <div>
53             <CounterBg/>
54             <AutoWelcome/>
55             <ShowMessage/>
56             { /* <ProfileCard/>
57             <LiveInput/>
58             <LoginForm/>
59             <FeedbackForm/> */ }
```

```
102     { /* mock */  
103         <UseState2/> */}  
104     { /* <UserContext.Provider value="abc">  
105         <ChildComponent />  
106         </UserContext.Provider> */}  
107     </div>  
108 );  
109 }  
110 export default App;  
111  
112
```

Count: 6

+ Increase - Decrease

Count is greater than 5

Welcome to React Hooks
