Name: Dhanya S

I am Dhanya S from Kakunje software working as an intern. Today i had my 21 session it was an interesting session and mam had thought us about ReactJS. Today i learned about class component how to import react in class component, difference between functional and class component, with using props and also without using props, and also we had seen how to give multiple values in function, how to call the parent component inside the App.jsx, if and else component with function and also by using arrow function, Ternary component, and how to import the child component inside the parent component and how to call that parent component inside the App.jsx had been seen today.

demo > src > WelcomeFunc.jsx > default

```
1  import React from 'react'
2
3  function WelcomeFunc(props){
4    |   return <h2>Hello, {props.name}</h2>;
5  }
6  💡
7  export default WelcomeFunc;
```

demo > src > WelcomeClass.jsx > default

```
1  import React, { Component } from "react";
2
3  class WelcomeClass extends Component{
4      render() {
5          return <h2>Hello, {this.props.name}</h2>;
6      }
7  }
8
9  export default WelcomeClass;
10
```

demo > src >  Student.jsx >  Student

```
1  import React from "react";
2
3  function Student({ name, marks }) {
4    return (
5      <div>
6        <h3>Name: {name}</h3>
7        <p>Marks: {marks}</p>
8        <p>Status: {marks>40? "Pass" : "Fail"}</p>
9      </div>
10   );
11 }
12
13 export default Student;
```

demo > src > Parent.jsx > default

```
1  import React from "react";
2  import Product from "../Product";
3
4  function Parent(){
5    return (
6      <div>
7        <Product name="Laptop" price={50000} />
8        <Product name="Mobile" price={20000} />
9      </div>
10   );
11 }
12
13 export default Parent;
```

demo > src > Product.jsx > default

```
1  import React from "react";
2
3  function Product({ name, price }) {
4    return (
5      <div>
6        <h3>Product: {name}</h3>
7        <h3>Price: {price}</h3>
8        <p>Category: {price>30000? "Premium Product" : "Budget Product"}</p>
9      </div>
10    );
11  }
12
13  export default Product;
```

demo > src >  App.jsx >  App

```
1  import React from 'react';
2  import WelcomeFunc from './WelcomeFunc';
3  import WelcomeClass from './WelcomeClass';
4  import Student from './Student';
5  import Parent from './Parent';
6  // import Welcome from './Class';
7  // import Counter from './Counter';
8  // import Counter1 from './Counter1';
9  // import Greet from './Greet';
10 // import Greet1 from './Greet1';
11 // import Usercard from './Usercard';
12 // import Login from './Login';
13 // import Role from './Role';
```

```
24
25 function App(){
26     // const showMessage =()=>{
27     //     alert("hello from parent component");
28     // };
29     return(
30         <div>
31             <WelcomeFunc name="Dhanya"/>
32             <WelcomeClass name="student"/>
33             <Student name="Diya" marks="80"/>
34             <Student name="Riya" marks="30"/>
35             <Parent/>
36             { /* <StudentDetails/>
37             <Multiple/>
38             <Button/>
39             <Message/> */ }
40             { /* <Welcome/>
```

```
52         <Role/>
53         <Ternary/> */}
54         {/* <Dashboard/> */}
55     </div>
56 );
57 }
58 export default App;
59
60
```

Hello, Dhanya

Hello, student

Name: Diya

Marks: 80

Status: Pass

Name: Riya

Marks: 30

Status: Fail

Product: Laptop

Price: 50000

Category: Premium Product

Product: Mobile

Price: 20000

Category: Budget Product
